

Company policy, quality objectives and environmental protection policy

In its development process the company sets objectives through which it implements the strategy of constant improvement and growth in the entire context of its business operation by taking into consideration the expectations of all the interested parties.

Mission and values

- To build the idea that the success of the company is the success of people who work in it.
- To acquire new skills and developing creative relations between the company's employees is the goal that we set for ourselves before the concern to maximise operating effects.
- To ensure the protection of the environment in which we operate and the safety of the company's employees.
- To build the trust of partners and associates in our products and our intentions.
- To encourage the creativity of employees, which is the foundation of the satisfaction of our partners.

In realising these objectives we take into account product safety, we reduce the potential risks for the employees and we observe the applicable legislation.

Vision

The company mission gives rise also to its goals and vision:

- To become partner with our customers in developing products using specialised know-how that we build with work and experience.
- To develop the best solutions for every customer according to the principle of guiding the partner to the best product.
- To ensure a high reliability of products and services through risk analysis and control for customers.
- To maintain and improve a quality management system based on the requirements of the IATF 16949 standard by taking into consideration new market requirements.
- Constantly control the measurable annual quality objectives and effects of environment protection, and regularly adopt the necessary preventive and corrective measures.
- To constantly monitor and improve the impact of the company on the environment in accordance with the ISO 14001 guidelines with the purpose of constantly improving the efficiency of environmental protection and the alignment with the legislation
- Sensible use of assets and resources with constant reduction of negative impacts on the environment.

In accordance with the environmental protection policy the SEP factory undertakes to continuously prevent and reduce the impact of its activities on the environment and health, to contribute to the protection of property by managing energy consumption, by decreasing raw material consumption, reducing the volume of waste at the source, preventing soil and groundwater pollution, managing water consumption and water discharge into the aquatic environment, preventing pollution due to environmental incidents, reducing noise pollution, and managing chemical risks

THE SUCCESS OF THE COMPANY IS THE SUCCESS OF THE PEOPLE WORKING IN IT!
